Subject: Benning Road Gen Station Metal Excursion Follow-up Letter
Attachments: Storm Event Flows_Outfall 013Q 2-27-12.pdf; Follow Up Letter to EPA June 2013.doc

Ms. Hopkins,

This email is a follow-up to the June 26, 2013 notification of a metal excursion of copper, iron and zinc from a storm water grab sample taken at the Benning Generating Station Outfall 013Q NPDES Permit No. 0000094. The attached explanation letter and status update is for your review a hard copy of the explanation letter will be mailed overnight to your attention.

If further information regarding the metal excursion is needed please contact me at your earliest convenience.

Regards,

Michael V. Williams
